

POTATOES

Main crop potatoes

Target: improving average diameter and marketable yield.

LALRISEVITA

>10⁹ CFU/g of *Bacillus velezensis*

- ✓ Solubilizes phosphorus:
+28 % of phosphorus available in the rhizosphere*.
- ✓ Stimulates growth of efficient roots (root hairs):
+20 % of root biomass*.
- ✓ Probiotic effect: rhizosphere occupation by beneficial microbes.

*results obtained from various trials over the past 10 years.

LALSTIMOSMO

Natural Glycine Betaine, crystallized and purified: >97%

- ✓ Increasing the ability of the plant to retain water.
- ✓ Improving the resistance of tissues and maintaining metabolism in cases of hydric stress, salinity or temperature shock.
- ✓ Enhancing the mobilization of nutrients such as calcium and trace elements.

Modes of action

Benefits

- ▶ Increasing number of tubers
- ▶ Increasing yield of targeted diameter
- ▶ Improving visual quality of tubers

- ▶ Improve diameter evenness
- ▶ Improving average diameter
- ▶ Improving flesh integrity

LALRISEVITA

1 lb/ac

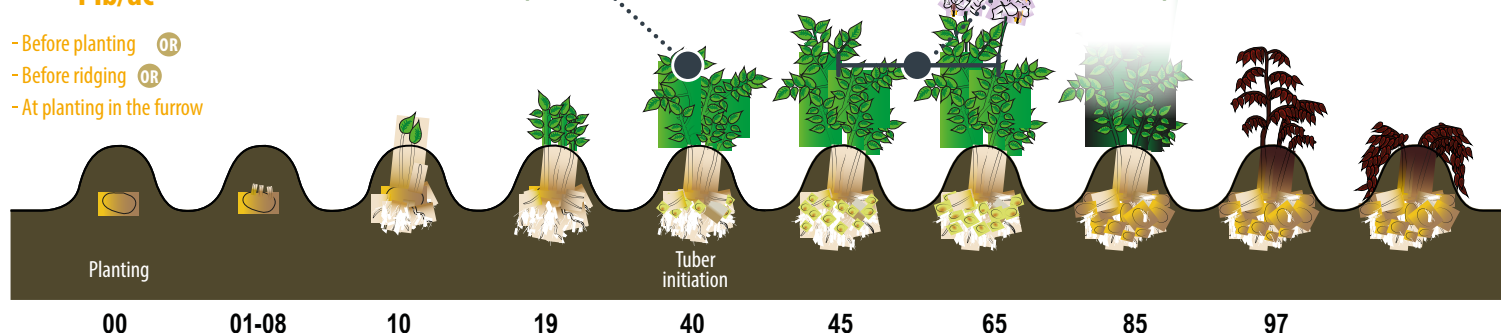

- Before planting OR
- Before ridging OR
- At planting in the furrow

LALSTIMOSMO

Min. 1 lb/ac

LALSTIMOSMO

Min. 1 lb/ac
